Professional Profile

🚀 **Technical professional transitioning to Full Stack Development.** 20+ years in IT (support, infrastructure and troubleshooting). Currently deepening expertise in Python, JavaScript, HTML/CSS and web development. Specialist in optimizing processes, reducing MTTR (Mean Time To Resolution) and increasing FCR (First Contact Resolution). Continuous learning mindset, problem-solving focus and excellence in customer service.

Objective

💡 Transition to **Full Stack Development / Frontend** in an agile environment, applying expertise in problem-solving, code quality and user experience. Contribute with solid IT foundation, clear communication and rapid learning ability.

Professional Experience

Service Desk Technician

September 2024 - Present
Atos

- Reduced MTTR on common incidents by standardizing diagnostic scripts and solution bases
- Increased FCR by documenting reusable resolution steps and guiding users during support calls
- Support for operating systems, office packages, connectivity and peripherals
- Ticket registration and follow-up until complete resolution

Technical Support Specialist

January 2003 - December 2017
Petroleum of Venezuela C.A. - Anaco

- Resolved hardware/software and network incidents, prioritizing rapid restoration of operations
- Implemented preventive maintenance routines that reduced recurring failures and downtime
- On-site and remote technical support for company users
- IT asset inventory management and control

Academic Background

Python Full Stack (EBAC - British School of Creative Arts and Technology)

2024 - 2025
Web development with Python, JavaScript, HTML, CSS, React and Databases

Computer Science Technician (integrated with secondary education)

1994
Isaac Newton University Institute of Technology
